College of Art, Technology & Environment

COSHH RISK ASSESSMENT FORM

No. Once your risk assessment has become 'active' you will receive a number.

Activity Title:	Type of activity:	Location of activity:
Soft silicone finger mixing, degasing and mold	Undergraduate internship	0T107
Assessed by (+date): Author of the risk assessment and date. Typically this should be the member of staff who will be carrying out or supervising the activity. If the person carrying out the activity is an undergraduate, then their supervisor should write the risk assessment. Dandan Zhang 17/07/2023	**Endorsed by (+date):** The RA should be endorsed by a second member of staff. Who it is will be dependent on the activity; examples include: • (for preparation work) Lab manager or member of technical staff. • (For practicals) Academic in charge of the practical class. • (For research) Author's line manager or research supervisor. • (For undergraduate projects) Lab manager or appropriate member of technical staff. Date of endorsement is to be included.	**Assessment review date:** May be just the month and year. To be no more than one year on from the date of endorsement.

Description of experimental procedure. (Give sufficient detail so that it is clear as to the procedure being undertaken, to include substances to be used and importantly created)

Pour the two silicone A and B on the plastic bowl respectively and weight on the scales.
Then mix them together to generate the silicone mixiture.
Degassing the silicone mixture.
Spray the bond it silicone release spray on the pla mold.
Pour the silicone mixture on the mold.

Have you used the least hazardous substances possible in this procedure in order to eliminate or minimise the hazards to health? (✓)

Yes ☑ No ☐ (If No *please justify*)

It is vital to tick one of these boxes. It is perfectly acceptable to tick 'no' if it can be demonstrated that it is necessary to use a particularly hazardous substance/chemical. E.g. 'needed to be used in order to reach a genuine learning outcome'

Substance details

Substance *(chemical, radiological or biological agents. Including those created by activity)Include the common chemical name from 1.1*	**Quantity and concentration** *Amount in mL or g then concentration in Mg/Ml, %w/w, w/v, Molarity.*	**Classification** *(corrosive, toxic, flammable, Biohazard Group 1-4) From pictogram 2.2 - Please use words to describe the pictogram. See end of this form for description.*	**Hazard Statements** *to include exposure routes & potential health effects. From Label elements 2.2 – Hazard Statements (H-numerical and description only).*	**Exposure Time** *(duration / frequency of use)*
Silicone RPRO 30 Base A	200g	No harzard	No harzard	10 mins once per mold
Silicone RPRO 30 Hardeber B	200g	No harzard	No harzard	10 mins once per mold
Bond it silicone release spray	300ml	Danger Hazard statements (CLP) : H222 - Extremely flammable aerosol. H229 - Pressurised container: May burst if heated	H222 Extremely flammable aerosol. H229 Pressurised container: May burst if heated.	30s once per mold

Identify those persons at increased risk of harm (disabled, pregnancy, immuno-compromised etc.)

This section *must* be filled in. If no-one is at increased risk, 'N/A' is perfectly acceptable in order to show that this element of risk has been considered.

Control measures for the activity – to minimise previously identified hazards *i.e.: Engineering controls e.g. use of fume cupboard etc., PPE/RPE (detail type), restricting quantity of substance used, prohibiting lone working.*

For Bond it silicone release spray
P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. P211 - Do not spray on an open flame or other ignition source. P251 - Do not pierce or burn, even after use. P410+P412 - Protect from sunlight. Do not expose to temperatures exceeding 50 °C.

Additional special measures of control - *Please consider all sections below:*

Manual handling:

Precautions for safe handling : Ensure good ventilation of the work station. Wear personal protective equipment. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. Hygiene measures : Do not eat, drink or smoke when using this product. Always wash hands after handling the product.

Specialist training:
N/A

Assistance / Supervision:
N/A

Health surveillance:
N/A

Other:

Indicate any specialist safety information relating to any of the substances in use - *Please consider all sections below:*

Treat each section as mandatory, for each substance or group of substances, rather than as suggestions. This will demonstrate that each area of risk has been duly considered. Again, 'N/A' is a perfectly acceptable answer:

Storage:
Protect from sunlight. Do not expose to temperatures exceeding 50 °C/ 122 °F. Store in a well-ventilated place. Keep cool.

Transportation:
N/A

Disposal:
N/A

Spillage:
N/A

First Aid:
First-aid measures after inhalation : Remove person to fresh air and keep comfortable for breathing. First-aid measures after skin contact : Wash skin with plenty of water. First-aid measures after eye contact : Rinse eyes with water as a precaution. Seal It Services T/A Bond It Unit G16 River Bank Way Lowfields Business Park HX5 9DN Elland - United Kingdom T 01422 315 300 - F 01422 315 310 kayleighcox-nowak@bond-it.co.uk - www.bond-it.co.uk Silicone Release Spray Safety Data Sheet according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2015/830 7/7/2020 (Version: 1.0) EN (English) 2/6 First-aid measures after ingestion : Call a poison center or a doctor if you feel unwell.

Are any of the substances that you are using flammable, oxidising or explosive (name them)?
Bond it silicone release spray
Have you included suitable control measures above?
Yes
Re-read the classification section for the substances you have listed. Should any be flammable/explosive, ensure that there *are* suitable control measures outlined in the section for 'control measures' above. Measures may include:

- Ensuring no naked flames
- Using a fume hood
- Specific PPE

	GHS01	Explosive		GHS04	Gases under pressure		GHS07	Harmful / Irritant / Skin sensitiser
	GHS02	Flammable		GHS05	Corrosive		GHS08	Carcinogen / Germ cell mutagen / Reproductive toxicant
	GHS03	Oxidising		GHS06	Acute toxic		GHS09	Hazardous to the aquatic environment
